## Summary

Full Stack Developer with nearly 3 years of experience in building scalable web applications using **C#, .NET Core, Angular, React, Azure, and MS SQL Server**. Strong in developing high-performance backend systems, optimizing databases, and creating secure, user-centric solutions. Experienced with **CI/CD pipelines, Clean Architecture, SOLID principles**, and modern coding practices, delivering high-quality solutions in **agile environments**.

## Technical Skills

**Languages:** C#, ASP.NET 4.5, Python, TypeScript, JavaScript, HTML5, CSS3  
**Frameworks:** .NET Core, MVC, FastAPI, Angular, React, Bootstrap, Entity Framework, RESTful APIs, LINQ  
**Databases:** Microsoft SQL Server, PostgreSQL, Redis, Azure Table Storage  
**Cloud Platforms:** Microsoft Azure (Functions, App Services, Service Bus, Storage, DevOps, Notification Hubs)  
**Developer Tools:** Git, GitHub, Docker, Postman, Visual Studio, VS Code, Azure CLI, CI/CD Pipelines  
**Concepts & Practices:** OOP, SOLID Principles, Clean Architecture, Microservices Architecture, Cloud-Native Development, Agile & Scrum

## Experience

| Software Developer                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | Aug 2023 – Present              |
