PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 3+ years of experience specializing in .NET ecosystem, Angular, and SQL Server. Proven track record of delivering scalable enterprise applications across the complete software development lifecycle. Expert in building modern web applications that balance performance, usability, and maintainability. Strong problem-solving skills with experience in requirement gathering, system design, development, testing, and deployment.

TECHNICAL SKILLS

Backend Technologies: C#, ASP.NET, ASP.NET Core, .NET Core, Blazor

Frontend Technologies: Angular 19, TypeScript, JavaScript, HTML5, CSS3

Database & Tools: MS SQL Server, MySQL, Entity Framework, LINQ

Testing & Automation: Playwright, Unit Testing, Integration Testing

UI Frameworks: Syncfusion Components, Telerik Kendo UI, Responsive Design

Additional Skills: Python, SODA Library, RESTful APIs, Git, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Engineer

Jan 2024 – Present

Key Software Inc.

Chennai, India

- Architected and delivered end-to-end enterprise solutions handling backend, frontend, and database layers for multiple concurrent projects
- Led development of PHI Scrubber application for healthcare data anonymization, implementing configurable scrub rules and ensuring HIPAA compliance
- Collaborated with stakeholders to gather requirements and translate business needs into scalable technical solutions
- Implemented task pause/resume functionality for long-running data processing operations

Junior Software Developer

Nov 2022 – Jan 2024

Syncfusion

Chennai, India

- Contributed to development and enhancement of Syncfusion's Blazor Diagram component, implementing user-requested features
- Resolved 50+ customer tickets through effective debugging and solution implementation
- Automated unit test cases using Playwright, improving test coverage by 40% and reducing manual testing time
- Gained hands-on experience building rich interactive UIs using .NET technologies and Blazor framework

KEY PROJECTS

MPM Core – Enterprise Management Platform | C#, ASP.NET Core, Angular 19

2026 – Present

- Developed and maintained an enterprise web application for managing templates, workflows, configurations, and dynamic content management. Worked on both frontend and backend modules including UI development, API integration, validation handling, role-based access, and performance optimization.

PHI Scrubber Application | C#, ASP.NET Core, Angular, MS SQL Server

2024 – 2025

- Healthcare data anonymization system for identifying and scrubbing Protected Health Information across large databases with configurable rules and compliance tracking

Data Quality Monitoring Tool | C#, ASP.NET, Python, SODA Library, MySQL

2024 – 2025

- Configuration-driven data validation system with Python-powered engine and interactive dashboard for monitoring data quality metrics across multiple data sources

Blazor Diagram Component | C#, Blazor, Playwright, .NET

2022 – 2024

- Enterprise-grade diagramming component for Blazor applications with rich interactive features, automated testing, and comprehensive customer support

EDUCATION

Thanthai Periyar Govt. Institute of Technology
Bachelor of Engineering in Electronics and Communication

Vellore, India
2018 – 2022

PROFESSIONAL HIGHLIGHTS

- Successfully delivered enterprise-scale applications from design to production deployment.
- Demonstrated strong ownership by independently handling development, debugging, and production support activities.
- Experienced in full-stack development across frontend, backend, database, and API integration layers.
