

SASIDHARAN SENTHILKUMAR

Full Stack Developer

Chennai, India | +91 7806977794 | sasidharan192000@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL OVERVIEW

Software Engineer with 3.7 years of experience building scalable enterprise applications. Skilled in building scalable applications (Angular, Node.js, SQL). Proven success in modernizing legacy systems, improving application performance by up to 50%, and delivering secure, high-quality software in Agile environments. Experienced in cloud platforms (AWS, Azure) and enterprise security systems.

TECHNICAL SKILLS

Frontend: Angular, Next.js, HTML, CSS, JavaScript, TypeScript, Micro-frontends, AgGrid
Backend: Node.js, Express.js, REST APIs, Websockets, Python, ORM.
Database: MSSQL, MYSQL, Stored Procedures, Database Design, Query Optimization.
Cloud & DevOps: AWS (IAM, SES, CloudFormation, EC2, S3), Azure, Docker, Linux, Git.
Security: CyberArk, Privileged Access Management (PAM), IAM, Security Compliance.

EXPERIENCE

Software Engineer Oct 2022 - Present
Accenture Chennai, India

Technologies: Angular, Node.js, SQL, Micro-Frontends, Copilot, AWS, Azure

- Built **25+ reusable Angular UI components** and optimized **Node.js services**, along with authoring **15+ stored procedures and optimized SQL queries**, enabling 30% faster feature delivery and improving backend data processing performance.
- Implemented location-based FTE cost adjustment logic, enhancing budgeting accuracy by **10%** and enabling more reliable workforce cost forecasting at an enterprise level.
- Modernized a large-scale legacy application by **improving application architecture and code maintainability, reducing technical debt by 40%** while ensuring compliance with **enterprise security and design standards**.
- Migrated couple of Angular apps to **Webpack-based microfrontend architecture**, reducing load time by **50% and enhanced user experience**.
- Resolved **50+ critical production bugs** during **agile sprints**, reducing production incidents by **30%** and improving overall system stability and release confidence.
- Utilized **GitHub Copilot** to assist in writing Angular components, Node.js services and SQL queries **reducing development time by 60%** and improving overall developer productivity.
- Refined build configurations across three development environments, decreasing deployment failure rate by 25% and resulting in a more stable and reliable software release process for all teams
- Provided **team leadership and peer support** to a **10–15 member development team** by aligning tasks, clarifying requirements, and resolving technical queries, resulting in **on-time sprint delivery across multiple releases**.

PROJECTS

Open Source Contributor Jan 2025 - Present
Team Shiksha (Remote) Remote

Technologies: Next.js, Node.js, MYSQL, Prisma, Docker, AWS

- Integrated **AWS SES with a Python-based email service API** to deliver high-volume notification emails, sending **100+ emails** per day with **high reliability and delivery success**.

- Developed and integrated **Google OAuth authentication**, enabling **secure single sign-on (SSO)** and reducing user login friction, resulting in a **faster and more seamless authentication experience**.
- Automated email delivery by developing **cron jobs**, ensuring **timely notification processing** and improving consistency of user communications.
- Integrated **Zoom OAuth and Meeting APIs** to enable authenticated users to auto-create Zoom meetings during event creation.
- Collaborated with a **20+ member agile team** on feature development and bug fixes, contributing to **more stable releases and improved product reliability**.
- Developed a **Next.js-based communication chat UI components** enabling secure, role-based interactions **between users and admins**, improving communication clarity and responsiveness within the application.
- Enhanced **technical documentation and onboarding guides**, reducing new contributor ramp-up time by 25% and improving overall team efficiency.

Budget Tracker (Personal Project) – <https://github.com/sasidharan19/Budget-Tracker>

- Built a full-stack budget management application using **Angular, Node.js, Express, Prisma, and MySQL** with JWT-based authentication and role-protected APIs.
- Implemented interactive financial dashboards with **D3.js**, including monthly income/expense summaries, category-wise expense distribution, and budget vs actual comparison, and deployed the application on **Vercel** (frontend) and **Railway** (backend + MySQL).

AWARDS & ACHIEVEMENTS

- **Client Recognition Award (2x)** – Recognized for delivering 100% on-time releases across multiple high-priority enterprise projects.
- **Direct Recognition from Onsite U.S. Client** – Acknowledged for leading successful long-term CyberArk integration of 2000+ database accounts with consistent delivery at each scheduled phase.

EDUCATION

Bachelor of Engineering - Mechanical Engineering, Panimalar Engineering College, Anna University. Chennai.
CGPA: 8.9 2018 - 2022

INDUSTRY CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals [AZ-900]
- Google Cloud Certified Associate Cloud Engineer
- Google Cloud Certified Generative AI Leader
- CyberArk Defender
