PROFESSIONAL SUMMARY

Full-Stack .NET Developer with 3+ years of experience in building web applications using React.js, Angular, ASP.NET Core, and PostgreSQL. Skilled in developing treasury and healthcare systems, API integrations, and query optimization. Hands-on with AWS, Docker, and CI/CD pipelines, delivering secure, scalable, and high-performance solutions. Strong in client interaction, agile teamwork, and end-to-end project delivery.

PROFESSIONAL SKILLS

- **Frontend:** React.js, Angular.js, Next.js, Bootstrap, Material-UI
- **Backend:** C#, ASP.NET, ASP.NET Web Forms, MVC, .NET Core Web API
- **Databases:** Oracle, PostgreSQL, SQL Server, MongoDB
- **Version Control:** Git, GitHub, Tortoise Git
- **API Development:** RESTful APIs, Postman, Swagger
- **Cloud Services:** AWS (EC2, S3)
- **DevOps & Tools:** Docker, CI/CD, Zrok

PROFESSIONAL EXPERIENCE

.Net FullStack Developer | Abhayaa Financial Technologies Pvt. Ltd., Chennai

June 2025 - Present

- Built and maintained **SIGMA** reporting system using ASP.NET and Oracle SQL Developer, enabling cross-border cash flow tracking and real-time reporting for IDFC First Bank's Treasury division.
- Served as L1 support, independently managing client interactions, troubleshooting issues, and ensuring high client satisfaction.
- Delivered minor change requests (CRs) including query optimization, stored procedure enhancements, and feature development tailored to client specifications.
- Enhanced Tracker module dashboard UI/UX, improving usability, performance, and overall reporting efficiency.
- Customized and optimized scheduler functionalities, automating task execution and streamlining business workflows.
- Designed and supported treasury operations by implementing logic for daily cash flow tracking (opening balance, multi-currency transactions, and EOD closing balances feeding into the next day).
- Migrated the legacy web site to a modern web application, refactoring old Oracle queries into parameterized queries, improving performance, security, and maintainability.

.Net FullStack Developer | THE DATALYTIX SOLUTIONS, Chennai

Aug 2023 - June 2025

- Built and maintain GPI Heart Monitoring Dashboard with React.js and .NET Core Web API, supporting real-time patient data.
- Implemented SignalR for live updates, improving refresh latency and clinician response times.
- Tuned PostgreSQL indexes and queries, cutting average response time and boosting throughput.
- Containerised services with Docker, ensuring consistent builds across environments.
- Integrated Amazon SNS to push instant user alerts, raising critical-event visibility.
- Designed and developed a responsive, SEO-friendly **Ecommerce Website** with an intuitive UI, enhancing user experience with MongoDB.
- **Cardiomatics API & Zrok Integration** - Developed a system to generate ECG signals, upload them to the Cardiomatics API, and initiate analysis with printable reports.
- Integrated Cardiomatics API for ECG processing, authentication, and user management.
- Configured Zrok for secure API exposure, enabling remote access for testing and real-time analysis.
- Optimized data pipelines to enhance cardiac assessment and streamline medical decision-making.
- Utilized Postman for API testing and Flask for handling requests efficiently.

.Net Full Stack Developer | REVATURE, Chennai

Dec 2022 - May 2023

- Delivered a **Hospital Management System** handling registrations, appointments, and billing for patient records.
- Designed scalable schema in Azure SQL, implemented Entity Framework migrations.
- Created RESTful services in .NET Core and Angular front-end, reducing page-load time.
- Protected sensitive connection strings with User Secrets JSON; validated all endpoints using Swagger.
- Designed and developed an **Ecommerce Website** with AngularJS.
- Implemented features such as product listing, shopping cart, and user authentication.
- Ensured responsive design and cross-device compatibility to enhance user experience.
