Summary

Results-driven .NET Full Stack Developer with 3+ years of experience in building scalable enterprise applications and RESTful Web APIs using C#, ASP.NET Core, Angular, and SQL Server. Strong in business logic implementation, API integration, performance optimization, and secure authentication mechanisms. Experienced in CI/CD pipelines using Azure DevOps and delivering finance and compliance automation solutions in large-scale ERP systems.

Skills

Backend: C#, ASP.NET Core, Web API, ADO.NET, LINQ, Microservices
Frontend: Angular (v12+), TypeScript, HTML, CSS, Kendo UI
Database: SQL Server, Stored Procedures, Functions, Triggers, Indexing
API & Security: REST APIs, JWT Authentication, Role-Based Authorization, CORS
DevOps & Tools: Azure DevOps, Git, Postman, Visual Studio, SSMS, SonarQube, SSIS
Concepts: OOP, SOLID Principles, SDLC, Multithreading, Async Programming

Experience

L&T Construction

Oct 2022 – Present

Software Engineer

Chennai, India

- Built and optimized scalable ERP applications using **Angular and ASP.NET Core**, driving financial process automation and performance improvements.
- Designed **RESTful APIs** following **SOLID** principles and clean architecture for real-time transaction processing and long-term maintainability.
- Secured APIs using **JWT** authentication, role-based authorization, model validation, and **CORS** configurations.
- Developed **microservices**-based systems using **OOP** principles, focusing on modularity, scalability, and high availability.
- Implemented **Dependency Injection** and common **Design Patterns** to build scalable and maintainable service architectures.
- Optimized SQL Server performance using stored procedures, indexing, and query tuning for high-volume transactional data.
- Designed and implemented custom **middleware** for centralized error handling and logging.
- Implemented Angular state management using **RxJS**, **Promises**, and **Observables** for predictable data flow and responsive UI.
- Built Windows Services and background schedulers using **multithreading** and **async** programming.
- Led framework upgrades: Angular to v12 and .NET to v8, improving performance and long-term support.
- Improved code quality through **SonarQube** analysis and structured code reviews.
- Delivered **CI/CD** pipelines via Azure DevOps, collaborating across product, QA, and business teams.

Projects

AI-Based Bank Guarantee Verification: Developed an AI agent for Bank Guarantee format validation and automated discrepancy reporting.

Agentic AI Payment Approval: Built an AI-driven auto-approval system validating invoices, cheques, and PAN documents against bank booking data, enabling instant disbursement.

E-Way Bill Automation: Automated Pan-India E-Way Bill generation handling approximately **12,400** bills per month.

GSTR-2A / GSTR-2B Data Scheduler: Automated GST data ingestion via third-party APIs, processing approximately **110,000** GSTR-2B records per month and **40,000** GSTR-2A records per day.

Bill Disbursement API: Designed API workflows integrated with RPA to automate bill disbursement and eliminate manual processing at SSC.

Regional Tax Approval Automation: Implemented rule-based invoice validation workflows to reduce operational effort and improve approval turnaround time.

Certifications

Angular – The Complete Guide (2024 Edition), Udemy [View Certificate](#)

Back-End Development with .NET, Coursera [View Certificate](#)

Education

Vel Tech Rangarajan Dr. Sagunthala R&D Institute of Science and Technology

Chennai, India

Bachelor of Technology in Computer Science — GPA: 8.60 / 10

Aug 2018 – May 2022
